## Legionella Management Systems

Software systems that work hard,.  
So you **don't**.

### L8MS - Risk Assessment

L8MS – Risk Assessment has been specifically designed to speed up the process of producing a risk assessment report to allow the reader to receive and access the report live from a secure web site.

The software has been designed to provide a uniform end product as efficiently as possible and now conforms to BS8580.

#### We believe L8MS Risk delivers: -

- Uniformity, multiple assessors deliver reports with the same structure.
- Central access for service providers, assessor and the client.
- The potential to increase quality without increasing survey time.
- The ability to create logbooks from the risk assessment data obtained.

#### Key Benefits:

- **Web based**— There is no local software to install and assessors can work from any internet enabled location.
- **Reduced write up times**— with re-useable surveys containing built in macros that allow fast survey write up.
- **Off-line surveys**— Assessors can fill in surveys in remote locations uploading when internet access is available.
- **Reduced printing**— Clients can select and produce a range of reports locally on demand these can be easily printed or saved as PDF documents.
- **Site specific control schemes**— Automatically generated by the software.

#### Is my data safe?

All records are held in a secure remote data centre. Our supplier (1&1) guarantees 99.99% uptime, and are confident in this guarantee as they have backup generators, multiple hard drives, dual routers, cooling systems and gel battery power banks. Industry-leading 130Gbit Connectivity. 24/7 monitoring by Internet specialists, 150+ permanently recording video cameras, Safety air-locks, Room in 11 areas for over 660 racks, which when fully equipped can accommodate more than 30,000 servers. "The largest and most advanced web hosting arena in the world."

#### Faster Survey Entry

We know when you are in a plant room it's hot sticky, dirty and all you want to do is get the job done and get out. We tried PDAs and there just too fiddly, laptops too bulky and a piece of paper just can't be beaten. L8MS Risk comes with a survey sheet so you can print it as an aid memoir for site, scribble on it, even use the back for a sketch. Each survey is provided in a MS Excel spreadsheet with standard answers and recommendations available for each question. Use them or just type / paste in your own. Save the survey and use it again for the next rusty, galvanized cistern with no lid, just changing the answers that are different.

#### Easy Access for Assessors, office & even clients

L8MS Risk is web based, just upload your survey sheets, pictures and comments from any web enabled PC. No local programs to install, all you need is Microsoft Excel (97-2003 or later) and internet explorer.

#### Automatic Reporting

Once you have surveyed the plant and selected your comments let L8MS Risk deal with the job of pulling together a pre-defined company standard report. All you need to do is give your client access or save it as a PDF and get it to the Responsible Person.

#### Building Record Systems

If you need to set up a site specific record systems it is surprising how long it will take. Having used L8MS Risk you are now in a position to use L8MS Manage our record keeping software. At the touch of a button every location will be set up with a monitoring and inspection schedule. You just need to say when to start and allocate the tasks.

#### Need some help

L8MS Consultancy can work with you from training an assessor to proof reading your surveys. The great advantage of using an online system means that should you request it we can work with you on the actual survey live, in real time.

#### So why do customers use L8MS Risk?

"...the system was chosen because it is based around the L8 requirements and assists our engineers in undertaking detailed and accurate Risk Assessments to the standards required by legislation and provides uniformity across our business. We recommend the implementation of L8MS Risk & L8MS Manage within all Water Hygiene proposals."
